

**Workshop Agenda**  
**Evaluating GHG Emissions Emitted From Proposed New Power Plants**  
**Wednesday, November 19, 2008**

*There is seating for about 30 at the front tables. If there is room and you would like to participate in the roundtable discussion, find a seat at the tables. Please limit one person per organization. If there is not room at the tables and you wish to speak, you will be given that opportunity.*

9:00—Introductions, Opening Remarks, and Overview of the Format and Expectations for the Workshop—Commissioner Byron and Commissioner Douglas

9:15—Complexities of Evaluating GHG Emissions—CEQA Baseline, CEQA Threshold of Significance, Project/Programmatic Approaches

Presentations

- The CEQA Context for Evaluating GHG Emissions from Power Plants--Dick Ratliff, Senior Staff Attorney, California Energy Commission
- Project by Project -vs- System Approaches--Will Rostov, Staff Attorney, Earthjustice
- Project by Project -vs- System Approaches—Chris Ellison, Attorney for Independent Energy Producers
- Conceptual Approaches for Evaluating GHG Emissions From Power Plants— Matthew Layton, Senior Air Quality Engineer, and David Vidaver, Senior Resource Planner, California Energy Commission

10:15--Roundtable discussion by all the participants

12:00-1:00--Lunch

1:00-2:15—Continuation of the before-lunch discussion

2:15—Short break

2:30—GHG Mitigation Measures (if GHG emissions exceed CEQA thresholds of significance)

Presentations

- Lucille van Ommering, Manager, Program Operation Section, ARB Office of Climate Change
- Rachel Tornek, Senior Policy Manager, California Climate Action Registry
- Lisa Trankley, Deputy Attorney General in the Environment Section, Attorney General's Office

3:00--Roundtable discussion by all
